President's Message

Raffi Aghvinian

2018 Happy New Year

Time to nominate and elect new President and Secretary. Please come with 2 nominees to fill these positions

Renewal of Tennyson Study Club dues \$210 made out to Tennyson Study Club. This includes your \$35 annual campus insurance fee which Bill Gould will pay to the school. Guests pay \$35 to cover the liability insurance fee for this meeting.

**Olga Ramadan, CDT,
MS,BS**

Infection Control Update 2018

Make sure you attend our first study club meeting for 2018 to get your CDT & RG infection control credit. Olga takes a serious subject and reminds us how important it is to keep everyone in the lab safe.

What's New for 2018

Wilma Peterson would like to inform us about her magic crystals. Please attend to see what these crystals can do for all labs.

Rafi has agreed to talk about 3D printers. As they become more popular in the dental lab what is the difference and build time, etc.

Kurt Tennyson, CDT

New developments in implant dentistry. Bone Ring, Stem cell growth of human teeth.

Tennyson Study Club awards two LACC graduates complimentary membership for 2018. Congratulations to Sonya Kim and Thea Vo

Digital dentistry is so important to learn especially for our students currently in school as they become our future employees. The advisory board at LACC was passionate about moving the students forward in this direction. Pasadena has committed to 20 station setup with 3 shape system to scan, design and mill. With Eileen Youngerman's hard work with Anita Bobich, CDT at PCC this will be a win win for Argen and PCC graduates. As Argen grows leaps and bounds as a digital resource for labs they also need well trained students to employ in the new scan and design center in San Diego. Too many cases in the lab to get done by the due date. Without hiring a new employee you can scan the model send for design services which are returned for you to view and Ok then put into daily production. After the Chicago Mid Winter meeting PCC will have an open house to see the growth of the dental lab program.
